I observed the above Historical events with "Four different Calendars". (1). Yahweh's Calendar is based on the 49 - Year Cycle, (2). Jewish Calendar based on the 19 - Year Cycle, (3). Jewish Calendar based on the 50 - Year Cycle), and (4). The Hindu Calendar is based on the 60 - Year Cycle. So, it was observed that the Tropical Year is obtained from the Luni Solar Cycle and the Synodic Month is obtained from the Tropical Cycle because the Luni Solar Cycle = The Tropical Year Cycle = Constant forever (Leviticus 25:8-9; Jeremiah 33:19-26).				All the above dates were proven historically, Scripturally, and Astronomically because of accurate Synodic Month and accurate Tropical Year that give accurate nights, accurate daytimes, accurate Phases of the Moon, accurate Seasons, and accurate Years. Please study on <a href="http://www.yhwhcalendar49.com">www.yhwhcalendar49.com</a>	The above dates were NOT proven historically, Scripturally, or astronomically. The Tropical Year, with 365.2467568 days, didn't give accurate Seasons, and the Synodic Month, with 29.53058885 days, didn't give accurate Phases of the Moon, accurate Seasons, and accurate New Years.	The above dates were NOT proven historically, scripturally, or astronomically. The Tropical Year, with 364.980782 days, didn't give accurate Seasons, and the Synodic Month, with 29.53058885 days, didn't give accurate Phases of the Moon, accurate Seasons, and accurate New Years.	The above dates were NOT proven historically, scripturally, or astronomically. The Tropical Year, with 365.1948488 days, didn't give accurate Seasons, and the Synodic Month, with 29.53058885 days, didn't give accurate Phases of the Moon, accurate Seasons, and accurate New Years.	

Note: AD = CE; BC = BCE; For the 4th Year of Solomon (1 Kings 6:1-2 = Proven historicalay and Astronomically = See the 588th page under Yahweh's Clock). Synodic Month gave "Different Tropical Years" as shown above.

Please study on <a href="http://www.yhwhcalendar49.com">www.yhwhcalendar49.com</a>	The above dates were NOT proven historically, scripturally, or astronomically. The Tropical Year, with 365.2422 days, didn't give accurate Seasons, and the Synodic Month, with 29.53022043 days, didn't give accurate Phases of the Moon, accurate Seasons, and accurate New Years.	The above dates were NOT proven historically, scripturally, or astronomically. The Tropical Year, with 365.2422 days, didn't give accurate Seasons, and the Synodic Month, with 29.55033981 days, didn't give accurate Phases of the Moon, accurate Seasons, and accurate New Years.	The above dates were NOT proven historically, scripturally, or astronomically. The Tropical Year with 365.2422 days didn't give accurate Seasons, and the Synodic Month, with 29.5344097 days, didn't give accurate Phases of the Moon, accurate Seasons, and accurate New Years.	

**RESEARCH:** It was observed that the "Tropical Year" with 365.2422 days gave "Different Synodic Months" as shown above. Moreover, the Tropical Year with 365.2422 days didn't give accurate nights, accurate daytimes, and accurate Seasons. So, the discoveries of astronomers (IAU, AND NASA) were NOT proven historically, Scripturally, and Astronomically because of inaccurate Synodic Month (29.53058885 days) and inaccurate Tropical Year (365.2422 days). So, the 49 Years proved that the Creator is Yahweh. Astronomers didn't prove that the Creator is Yahweh. My calculations proved that the Creator is Yahweh because 49 years gave accurate Phases of the Moon, accurate Seasons, and accurate New Years - Jeremiah 33:19-26; 31:35-37; 32:26-27.
